- Too much contents, and too hard.
- Great course! Lots of useful knowledge gained from this course, and helps understanding algorithms and job finding.
- The topics in the last few weeks were covered too fast. It would have been better to get more time with difficult topics covered at the end of the classes. Additionally, it is difficult to understand the professor with his COVID mask on, but that is something, we unfortunately can not do anything about. Another point is that it would be better to get the PPTs before the class, so that if we need to annotate anything during the class, it is possible.
- The course is very well-distributed in its content and covers all the important algorithms and concepts.
